Recommendation X.509 (2000) I ISO/IEC 9594-8:2000
Draft Technical Corrigendum 9

(covering resolution to defect reports 310 and 311)

This corrects the defects reported in defect report 310

In subclause 7.3 Note 4 with the following:

NOTE 4 – When an implementation processing a certificate revocation list does not recognize a critical extension in the **crlEntryExtensions** field, that CRL cannot be used to determine the status of the certificate. When an implementation does not recognize a critical extension in the **crlExtensions** field, that CRL cannot be used to determine the status of the certificate. In these cases local policy may dictate actions in addition to and/or stronger than those stated in this Specification, such as seeking revocation status information from other sources. Certificates for which revocation status cannot be determined should not be considered valid certificates.

This corrects the defects reported in defect report 311

In subclause 7.3 delete Note 5
