October 20, 2017

---

MafDb.ExAC.r0.3.1.snvs.hs37d5-package

*Annotation package for minor allele frequency data from the Exome Aggregation Consortium*

---

## Description

This annotation package stores minor allele frequency (MAF) data for single derived from the single nucleotide variant set release 0.3.1 of the Exome Aggregation Consortium. The data is loaded automatically in the form of a MafDb2 object. The name of the exposed object matches the name of the package and part of the filename that contained the data imported into the package. The class definition and methods to access MafDb2 objects are found in the [VariantFiltering](#) software package.

Please consult the ExAC FAQ page at <http://exac.broadinstitute.org/faq> before you use these data for your own research.

## Format

[MafDb.ExAC.r0.3.1.snvs.hs37d5](#) MafDb2 object containing MAF values from the Exome Aggregation Consortium d

## Author(s)

R. Castelo
